## COMPANY

history at a glance

- ✓ Production facility in Münster (North Rhine-Westphalia), Germany
- ✓ Years of experience in filter manufacturing
- ✓ Specializing in the independent aftermarket
- ✓ DIN EN ISO 9001 certified
- ✓ Highly-developed and transparent sales structure

## HISTORY

### of Airmatic

Airmatic has been in business since 1996. Our company is located in Münster, Germany where we manufacture and distribute top-quality cabin air filters. We currently employ 30 highly-skilled workers.

Airmatic made significant headway in 1999 when we obtained DIN EN ISO 9001 certification (production and distribution of filters for technological purposes).

Our wide-ranging assortment enables us to provide cabin filters for all conventional cars, transporter, trucks, buses, and agricultural and construction machinery.

Thanks to our clearly laid out and well-organized sales structure, Airmatic now supplies leading market participants around the world. Our entire assortment is listed at TOPMOTIVE. We can provide you with partial extracts specifically adapted to your individual needs.

## 5 GOOD REASONS

for choosing Airmatic cabin air filters

- ✓ **Huge selection:**  
730 types of particle, activated carbon, and bio functional activated carbon filters for 85,734 different vehicle applications.
- ✓ Covers approx. 95% of fleet vehicles
- ✓ High supply ratio
- ✓ Speedy response to inquiries
- ✓ High filtration performance

## HIGHEST QUALITY STANDARDS

for the independent aftermarket

We now design and produce over 730 different types of cabin air filters for cars, transporter, trucks, buses, and agricultural and construction machinery. We strive to provide customers with a wide and steadily-growing selection of particle, activated, and biofunctional activated carbon filters.

Our vast supply of readily-available merchandise –unmatched in the aftermarket air-purification business – ensures fast and efficient service.

Our filters are made with top-quality components. To achieve maximum filtration efficiency, we use premium-quality polyester which is developed and manufactured according to OE standards. The brilliant performance capabilities of Airmatic cabin air filters are “a breath of fresh air” for vehicle occupants. The many advantages enable you to meet the needs of your own customer base – automobile repair shops, stores, etc. We make it possible for you to market your products with utmost efficiency.

## FLEXIBLE PRODUCTION AND SERVICES -

quality you can count on

Modern SPS-controlled production lines and fully-automated packaging systems enable flexible production and dependable high-quality standards, even on smaller batch sizes.

By continuously investing in the newest production technology and employee training programs, we are able to offer the independent aftermarket a huge selection of high-quality, **„Made in Germany“** products at very attractive prices.

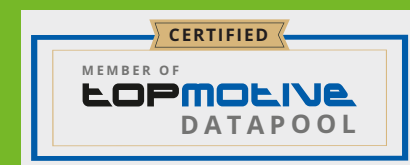

Orders are processed according to individual customer needs. Your own brand name can even appear on any of our filters. Our catalogue and TOPMOTIVE data provide up-to-date and comprehensive

information for identifying and ordering parts in the independent aftermarket. Technical drawings for easier identification are available upon request.

We offer a wide range of different filter designs tailored to individual customer needs. For more information, please, consult the following pages.

## ADVANTAGES of flexible production

- ✓ Low-volume production possible
- ✓ “Made in Germany” quality at competitive prices
- ✓ Individual order processing
- ✓ Our entire assortment can also be labeled with your own brand name
- ✓ Custom-made fabrication
- ✓ TOPMOTIVE data accessibility
- ✓ Technical drawings available upon request
- ✓ German precision for easy installation

## A WIDE VARIETY OF FILTERS

for every requirement

Depending on the type of vehicle and filter design, approx. 100,000 liters of ambient (outdoor) air flow into the interior of the vehicle every hour.

This can lead to an increased concentration of pollen and contaminants that are known to cause sneezing attacks, watery eyes, headaches, and breathing difficulties. It is a proven fact that the air quality inside the vehicle can be 25 times worse than the EU's stipulated roadside limit value of 40 micrograms of NO<sub>2</sub> (nitrogen dioxide) per cubic meter.

This increases inflammatory levels in the blood and can result in severe chronic diseases. The driver and occupants of the vehicle suffer the most from the harmful emissions produced.

High-quality cabin filters protect the occupants by filtering the outside air before it enters the vehicle. There are now four product quality levels to choose from.

### Particle filter

With a high-quality and precision-fit particle filter, pollen, spores, dust, and soot are reduced to 0.005 mm in size and cannot enter the interior of the vehicle.

### Activated carbon filter

Activated carbon filters have an additional activated charcoal layer. Besides the function of the particulate filter described above, the activated carbon filter adsorbs odours, harmful gases, ozone, benzene and nitrogen dioxide, binds these and reduces penetration into the vehicle interior by approx. 90 %.

### Premium Activated carbon filter

Airmatic Premium activated carbon filters have a higher Grammage of high-quality activated carbon. This enables a even better adsorption performance and service life of the filter.

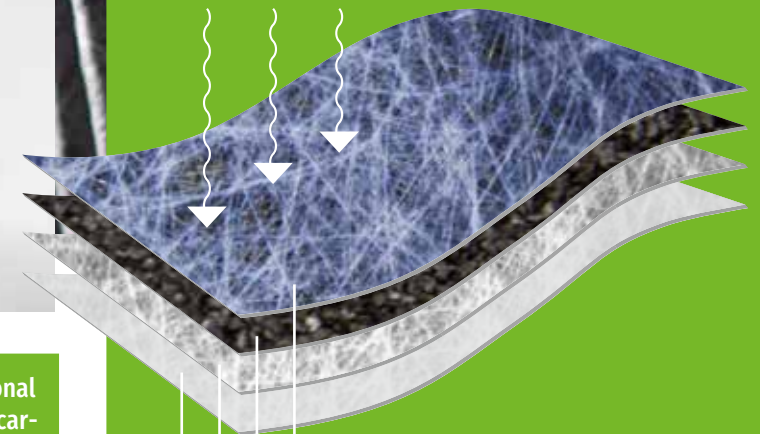

### Biofunctional activated carbon filter

This is the latest development stage in the segment interior filtration and prevent, besides particle filtration and the binding of harmful gases, through the use of fungistatic filter media, which can be damaged by deposited dirt and moisture. Bacteria and moulds form and multiply on the filter. This was successfully tested at the Materialanstalt Bremen according to DIN EN 846:1997 Procedure A+C proven and confirmed. For these Product design will continue to be a PM 2.5 standard according to test standard DIN 71460-3 confirmed.

## ADVANTAGES

of regular filter replacement

- ✓ Prevents windshield from fogging up
- ✓ Keeps windshield clean for a longer period of time
- ✓ Extends the service life of the heater, ventilation fan, and air conditioning system
- ✓ Filters exhaust from diesel-powered vehicles
- ✓ Reduces accumulation of contaminants in the vehicle
- ✓ Prevents headaches and nausea
- ✓ Helps asthmatics and allergy sufferers
- ✓ Enhances driving comfort
- ✓ Improves road safety
- ✓ Small investment with great benefits

## REGULAR FILTER REPLACEMENT

is essential

Over time, cabin air filters become clogged with pollen, dust, and dirt particles. Depending on vehicle use and filter type, between 100,000 and 500,000 liters of air enter the interior through the ventilation system every hour. The time of year, weather conditions, road surfaces, surroundings, and air quality all have an impact on the life cycle of the cabin filter. To keep the air fresh in the vehicle at all times, it is important to replace the cabin filter on a regular basis. A

clogged cabin filter inhibits the flow of fresh air in the car. As more dust, pollen, and other airborne contaminants make their way into the vehicle, the air quality in the car is actually worse than the air at the side of the road.

A plugged-up cabin filter can even lead to mechanical problems.

## CAR AND TRANSPORTER FILTERS

keep air fresh inside the vehicle at all times

Airmatic cabin air filters create positive, well-ventilated driving conditions. Good health must always be a top priority. With a high-quality, custom-fit particle filter, dirt particles, dust, diesel soot, and exhaust emissions cannot enter the interior of the vehicle. This is especially important for allergy sufferers and asthmatics. Fully-functional cabin air filters increase driving comfort and enhance concentration while driving.

## BUS FILTERS

for longer and safer journeys

On longer bus tours, the health and safety of drivers and passengers are paramount. Tour groups are often on the road for days. Fatigue and drowsiness are very common. Our many different types of filters improve air flow in the vehicle, boosting alertness and overall driving comfort. Regular filter replacement is therefore extremely important.

## AGRICULTURAL AND CONSTRUCTION MACHINERY FILTERS

for high-performance engines

Modern, high-performance machinery can only be operated efficiently if the driver/operator is focused and fit. Our highly efficient cabin air filters help maximize safety and guard against contaminants, pollen, bacteria, and unpleasant odors. We have the right filter for the most diverse customer requirements.
